

# Fowler Oliver Maxicap Destoner

(Manufactured under license from Oliver Manufacturing Co., USA)

## Maxicap DS

The Fowler Oliver destoners extract heavy particles from a larger quantity of light material and in turn, purify and add value to your product.

The Maxi-Cap DS was specifically designed for our customers to fill the need for a heavier duty machine capable of handling larger, more demanding capacities. Crafted to be long-lasting and dependable load after load, this larger Maxi-Cap machine is still very accurate and features the same Oliver precise control that our customers find so valuable.

The destoner is designed to make a two-way division of a small volume of heavy material from a larger volume of light material. Fowler Oliver's Maxi-Cap destoners enhance the value of many different materials through the division of light and heavy particles. Heavy contaminants as well as purity grades can be achieved, resulting in improved quality of your product.

## FOWLER OLIVER DESTONER

### Standard Construction:

- Active Counterbalance System provides smooth operation and ease of installation.
- Hydraulic – Air, Side and End Raise Adjustments with “OptiDrive” Eccentric Control allow precise, accurate separation results.
- Patented multiple fan design supplies uncompromising weighing accuracy, which is the key to fluidization and stratification.
- Aspirating Feeder or optional Full Dust Hood are designed to handle dust, dirt and fine particles – a must to satisfy dust collection requirements.

- **High Capacity Separation**
- **Direct, Fast-Acting Hydraulic Controls**
- **Easy to use**
- **Superior engineering**
- **OptiDrive and Hydraulic Controls**
